

April 16, 1975

having the Resolution and then having to write a bill afterwards. We do it all with one thing and then everybody can see it exactly what the intent is to start.

SENATOR KOCH: Well, if you were to put a Resolution on the floor the purpose of which is to study this question, wouldn't that serve the same purpose? The Resolution has to be read, printed in the Journal. We all make a determination.

SENATOR SIMPSON: No, I would say it would not be because it, in no way, puts into form what you are intending to do. It has no conclusions. This has a conclusion in it ahead of time, a specific conclusion.

SENATOR KOCH: Well, if you have a conclusion then, why have a study?

SENATOR SIMPSON: To see if that conclusion is feasible.

SENATOR KOCH: That sounds like an additional exercise in futility.

PRESIDENT: Senator Duis.

SENATOR DUIS: Mr. President, I think maybe I see what you are attempting to do here. With a Resolution, we would have arguments on the Resolution this year, as to whether or not, and this way you will not have arguments as to the study that is going to take place as to whether or not it should have a Resolution or not. Is that correct, Senator Simpson?

SENATOR SIMPSON: Yes.

SENATOR DUIS: Am I correct in my assumption?

SENATOR SIMPSON: You are making it very clear.

SENATOR DUIS: Thank you, sir.

PRESIDENT: Senator Marvel, do you wish to speak last on the matter of the request?

SENATOR MARVEL: I would like to, if I could direct a question to the Chair now. How many motions do we need to do this? I need a motion to get permission to introduce the bill, first.

CLERK: The only motion, so far, is the motion to introduce the bill.

PRESIDENT: It is a request, isn't it?

CLERK: It is a motion to introduce the attached bill, Request #837.

SENATOR MARVEL: OK. That is all I need then. No, I have nothing else, Mr. President.

PRESIDENT: This requires 30 votes. Record your vote. Record. The Chair recognizes Senator Marvel. Senator Marvel.

SENATOR MARVEL: Senator Koch changed to aye. I have nothing.
